Response to ED/62 proposed amendment to Policy CS9

1. Following discussion during matter 5 it was proposed that Policy CS9 be amended to include reference to assisting the relocation of some uses.

2. The Council can confirm that it supports the Inspector’s proposed wording for this policy set out in document ED/62. However it is suggested that the wording would most appropriately be located as an additional point at the end if the policy (ie point 9) rather than as point (3g) as appears to be proposed; point 3 specifically addresses priority sectors.
