Appendix O	Work Instruction for Winter Service	130
Appendix P	Weighbridge Method Statement	137
Appendix Q	Weighbridge Risk Assessment	139

# **ROTHERHAM METROPOLITAN BOROUGH COUNCIL**

## **HIGHWAY HIGHWAY SERVICES GROUP**

### **STATEMENT OF WINTER SERVICE POLICY**

Precautionary salting shall be carried out when ice formation on the highway can be reasonably anticipated from the daily weather forecasts and data from the Icelert stations. The network of roads to be treated will only include roads important to the free flow of traffic i.e. principal roads, other well used classified roads, bus routes, and access roads to hospitals and fire stations. Treatment will normally be completed prior to the morning rush hour. Where action is deemed necessary in Rotherham Town Centre on pedestrianised areas and footways, this will be undertaken before the morning rush hour.

When conditions of laying snow pertain, then snow ploughing and associated salting will be undertaken with routes being cleared in the order of their traffic importance. Once the Priority Network of roads is clear then action is carried out on Community Routes with the priorities for action being the areas where people are most at risk, i.e. sheltered housing, and footways near hospitals and schools. Available resources will be distributed in accordance with the location of snowfall.

Owing to the geographical nature of the Borough the busier pedestrian routes are widely spread in the outlying townships and it is not practicable to pre-treat these footways. Therefore, in addition to the Salt Bin Policy, extra salt bins are provided in these areas and the footways will be treated as community routes.

Salt bins will be provided and maintained for the 'self help' of highway users in accordance with the salt bin policy in Appendix C.

All winter action will be confined to highways maintainable at public expense and those highways which are to become maintainable.

This document has been reviewed in accordance with the recommendations of the Well Managed Highway Infrastructure Code of Practice. It is not a statutory requirement to comply with this code, but it is recommended that it is adopted to demonstrate best practice and to provide a more efficient and effective service.

## **WINTER SERVICE OPERATIONAL PROCEDURE**

This document sets out the procedure to be adopted in maintaining the highways in Rotherham Borough during adverse winter weather.

### Legal Requirement

Rotherham Borough Council as highway authority are under a legal duty to ensure, so far as is reasonably practicable, that safe passage along a highway is not endangered by snow or ice (Section 41(1A) of Highways Act 1980).

### The Winter Risk Period

For 2023/2024 the operational period for Winter Service commences on 13 November 2023 and ends on 07 April 2024. Winter Service activities including an extension of standby arrangements will be conducted outside this period if weather conditions dictate.

### Quality Management

The provision of Winter Service is defined on form SP/021/W1/03 which is included in Appendix O 'Work Instruction for Winter Service'.

### Document Control and Circulation

This document is updated annually and is published and circulated to the Winter Service staff just prior to the start of the winter season. An abridged version is made available on the Council's website.

## **1. The Decision Making Process and Responsibilities**

Decisions on the action necessary on receipt of a weather forecast will be taken by the Winter Co-ordinator.

Out of normal office hours the operational depot will be controlled by Duty Supervisors. The whole operation will be co-ordinated by the Winter Co-ordinator. Rotas for Winter Co-ordinators and Duty Supervisors are included in Tables 2 and 3.

Winter Co-ordinators will provide out of office hours standby cover on a seven-day rota during the winter service period. The handover of duties to the next Winter Co-ordinator on the rota will be each Monday morning.

In the event of a forecast for significant snowfall or prolonged sub-zero conditions a senior management team meets daily to provide clear leadership and take a strategic view of action. This provides a consistent approach to winter management operations and has been well received by the out of hours managers who have reported that by being part of this process they feel empowered when making difficult decisions outside normal office hours. Daily communications meetings will be held to agree media messages. Updates will be provided at regular intervals to ensure the latest information is available.

## 2. Road Weather Information Bureau Service

Road weather forecasts are provided by Met Desk Ltd seven days per week throughout the winter period. Their contact details are as follows:

Forecaster (24 hours)  
Account manager (09:00-17:30 Monday to Friday)  
Office number

There are three weather forecast sites, which are located at:

- Blyth Road, Maltby
- Pleasley Road, Whiston.
- A630 Rotherham Gateway, Catcliffe

### Update Criteria

The condition change criteria:

- (a) If there is a change of frost condition. No frost to frost or frost to no frost.
- (b) If the actual road surface temperatures are below or are forecast to go below zero degrees celsius, when initially forecast.
- (c) If there is a change in the snow forecast:
  - (i) A change in accumulation.
  - (ii) Change from isolated to widespread
  - (iii) Change to thaw timing.
  - (iv) Change in start/ end time if more than two hours.
- (d) If there is significant change in surface wetness and road surface temperatures are expected to fall to zero degrees celcius or below.
- (e) If there is a change in frost by two hours or more.

Forecasts are issued daily between October and April:

- (a) Preliminary Forecasts  
These are normally issued by 07:00.
- (b) Morning Summary  
These are normally issued by 07:00.
- (c) Twenty-Four Hour Forecast  
These are normally issued by 12:30.
- (d) Two to Five Day Forecast  
These are normally issued by 12:30.
- (e) Evening Forecast  
These are normally issued by 19:00

## Interpretation of Weather Forecasts

Information on the interpretation of the weather forecasts is available separately to the personnel responsible for making the salting decisions.

### **3. Road Weather Stations and the Bureau Service**

#### Road Weather Stations

Forecast Icelert weather stations are installed at three locations within the borough. They are equipped to measure road surface temperature, depth (sub-surface) temperature, dew point, wet/ dry/ ice/ salt detection, wind speed, wind direction and current weather conditions. They are located at:

1. A618 Pleasley Road, Whiston
2. A634 Blyth Road, Maltby
3. A630 Rotherham Gateway, Catcliffe

There are also four weather stations which provide information on road surface conditions only and they help to give a more complete picture of road conditions across the borough. They are located at:

1. B6059 School Road, Wales
2. B6089 Stubbin Road, Upper Haugh
3. A629 Upper Wortley Road, Kimberworth
4. A57 Worksop Road, South Anston
5. A630 Rotherham Gateway

#### The Findlay Irvine Bureau Service

##### Procedure

Winter Roads Management Systems are provided via a bureau service which is managed by Findlay Irvine. This is an internet-based service accessed through [www.icecert.net](http://www.icecert.net). All officers associated with the provision of Winter Service have appropriate password protected access to dedicated pages for Rotherham MBC on the site.

The Icelert website should be used by the Winter Co-ordinator to interrogate all Icelert stations and observe conditions at other sensor points across the Borough. The data received from the Stations should be used to confirm reports received from the forecast provider each day, and to confirm the decision to salt or not to salt.

The decision to salt or not should be logged on the message centre by 16:00 hours each day. If this action is to be varied, the information should again be posted on the site. Highway Services circulates details of the forecast/ action proposed to the appropriate personnel.

Confirmation of what action has taken place should be logged on the message centre by 09:00 hours every day.

If the Icelert data conflicts with the forecast report, further updated information may be obtained from the Duty Forecaster (see above for interpretation of weather forecasts).

#### 4. **Duty Supervisors Vehicles**

Two 4x4 vehicles with the appropriate chapter 8 signage and flashing beacons are provided for the Duty Supervisors. One vehicle is provided for use by the evening shift supervisor and one for the night shift supervisor. One of these vehicles should be made available for use during a normal working day.

#### 5. **Standby Arrangements in the Event of Equipment Failure**

Throughout the winter period the Winter Co-ordinator will be available as a 24-hour contact, together with a standby resource, including appropriate supervisory personnel in order to ensure compliance with service requirements.

Decisions on the action to be taken on receipt of weather forecasts will be made by the Winter Co-ordinator and instructions issued without delay. Action taken will be based on the notes and Table 1 entitled, "FORECAST PREDICTING FREEZING TEMPERATURES". On a marginal forecast the use of a supervisor patrol may be beneficial.

The Winter Co-ordinator will be issued with the following equipment:

- A bag containing:
  - Winter Service Manual
  - Winter Service call log-book
  - Laptop computer
  - Mobile phone with charger
  - Dongle

Arrangements will be made for Duty Supervisors to have access to the internet site from the operational depot. If, outside normal working hours, there is an equipment failure the following is to be carried out:

- Switch equipment off
- Check all connections
- Switch machine on, if there is still a problem contact the forecaster and ask the following questions:

**“When was the last update to the forecast for Rotherham?”**

**“What was the last update to the forecast for Rotherham?”**

Then, contact the Service Desk to attempt the rectification of the failed equipment on the next working day.

The procedure for contacting Met Desk should also be followed in case of problems with the bureau service. Difficulties experienced should also be notified to Findlay

Irvine on their 24-hour helpline number. There is also email support between October and April. Less urgent matters can be reported via the “Contact” page on the bureau itself.

## **6. Route Planning for Carriageways and Footways**

### Precautionary Salting and Treatment Times

The ‘Priority Network’ of roads shall only include principal roads, busier classified roads, access roads to hospitals and fire stations, public service bus routes and other roads of importance. Full details are given in the 10 routes included in this manual in Appendix G. Treatment times for individual routes will usually vary from 2 hours 40 minutes to 3 hours.

Precautionary salting action shall only be carried out on the Priority Network and will normally be undertaken on the basis of weather forecasts.

### Community Route Salting

The decision to carry out community route salting action on roads, footways and footpaths shall be made by a meeting of the Senior Management Team if weather conditions or weather forecasts dictate that this may be deemed necessary. Footway routes are detailed in Appendix J, K and L.

### Snow Clearing

When operating in conditions of lying snow then ploughs will be fitted to vehicles and snow ploughing and associated salting is to be carried out in order of traffic importance i.e. principal road, bus routes, etc. In such conditions vehicles may be double manned if deemed appropriate.

On some routes, road humps and platforms have been installed. Ploughs must be lifted before driving these routes. These roads are identified on the route schedules as ‘(RH)’.

### Strategic Road Network

A resilient network of roads has been established that includes principal roads and non principal roads as specified in the South Yorkshire LTP3 strategic network. These roads shall be treated as a higher priority than Rotherham’s priority network in the event of prolonged severe weather conditions. Full details are given in Appendix H of this manual.

### Rock Salt and Spread Rates

Neat ground dry 6mm rock salt is used for general purposes on all routes. Rates of spread should start at 10 gms/m<sup>2</sup> for precautionary salting using salt stored under cover and 15 gms/m<sup>2</sup> for salt stored in the open. In both cases the rate would increase to up to 40 gms/m<sup>2</sup> for hard compacted snow or ice. When snow is forecast or frost is

expected after rain, precautionary salting rates should be increased to between 25 and 40 gms/m<sup>2</sup> in order to melt the initial snowfall and provide a wet surface. The in-cab telematics are pre-set to a rate of 10 gms/m<sup>2</sup> for an automated salting operation. Therefore, where an increased spread rate is required, automated salting must be disabled to allow manual adjustment of the spread rate. The decision to increase the spread rate for events such as compacted snow etc. will be made by the Winter Co-ordinator.

At difficult sites on hills or bends, etc. salt bins are placed at appropriate locations adequately protected and maintained as necessary. The locations of Streetpride salt bins are listed in Appendix E. Special salting may be necessary to deal with melt water from windrows of snow which may freeze at night and a watch should be kept for such conditions.

Rock salt is procured from Compass Minerals UK Ltd, Bradford Road, Winsford, Cheshire CW7 2PE.

### **Footway Hand Salting**

#### Pedestrianised Areas

Operatives who are based in Community Safety and Street Scene will be deployed to clear snow and ice from pedestrianised areas, footways and footpaths in town centres, aged persons' centres, accesses to hospitals and steep gradients as necessary. Resources are detailed in Appendix A.

#### Footbridges

Footbridges are treated at the discretion of the Winter Co-ordinator or Duty Supervisor and this is based on the weather conditions at that time. Footbridge locations are listed in Appendix N. Footbridges are treated with urea which is a non-corrosive substance.

#### Cycle Tracks

Cycle tracks are treated in conjunction with treatment of the adjacent surface or class of highway.

## **7. Organisational Arrangements for Daytime Action**

Should the adverse weather extend into the working day then the following guidelines would be followed in managing further winter action:

### Situation - Heavy frost / light snow at start of working day

Duty supervisor to assess the situation and discuss the need for action with Highway Services if conditions are poor or marginal.

The Duty Supervisor will organise town centre treatment by cleansing operatives when necessary.

Requests for action will be passed to the Duty Supervisor until the depot staff become available. Where action is required, the Duty Supervisor will discuss with other supervisors the least disruptive way to provide the cover required. If priority work is likely to be disrupted then the decision will be referred to the Winter Co-ordinator.

Customer reports and daytime salting requests are to be emailed for action.

#### Situation - Snow or ice persisting through the day

The Duty Supervisor will agree the extent of action to be taken with Highway Services. If action is required to continue beyond the agreed time-frame then Duty Supervisor will notify Highway Services.

If the Duty Supervisor goes onto a compulsory rest period then the Duty Supervisor scheduled for standby duty on the week following will undertake the daytime action.

Requests received by the contact centre will be forwarded to Highway Services via email. Requests received by Highway Services staff will be emailed to the operational depot.

#### Situation - Lying snow forecast to persist for more than 24 hours

The Duty Supervisor will arrange for drivers to attend early if required. The Winter Co-ordinator will attend at the depot to manage operations. Nominated supervisors / technicians will control three areas of action:

- Filling of salt bins/ footpath salting teams
- Road salting requests
- Other salting action requests

Named personnel to undertake these roles, together with reserves, will be agreed prior to the start of the winter period.

All available resources will be deployed to assist in delivering the winter service including street cleansing and grounds maintenance operatives from Community Safety and Street Scene when conditions interrupt their normal duties. Teams will be deployed to clear snow and treat surfaces at agreed priority locations. Contact details for Community Safety and Street Scene and also Waste Management personnel for use during such conditions are given in Appendix A.

If required by the weather conditions and when resources become available, resources will be committed to assist the Waste Management Service in maintaining their ability to complete the collection of household waste as programmed.

The contact centre will be the contact for action requests. Requests received from members of the public will be forwarded to Highway Services via email.

Continuing action beyond the first day will be discussed between the Winter Co-ordinator and Highway Services.

## 8. Information Recording and Analysis

Records of action taken can be found in Appendix O. They are completed and then stored for the purpose of performance monitoring, audit trails and updates.

## 9. Performance Monitoring

Provision of Winter Service is recognised as a vital service provided for the benefit of highway users. Winter salt stocks are reported to Central Government via the Single Data List. Additionally, RMBC has a local performance indicator to measure the time taken to salt precautionary routes within four hours.

	2020/2021 Target	2020/2021 Actual	2021/2022 Target	2021/2022 Actual	2022/2023 Target	2022/2023 Actual	2023/2024 Target
Precautionary routes salted within the allocated time	100%	94.8%	100%	95.5%	100%	97.2%	100%

## 10. Winter Salting Vehicles

Vehicles used for precautionary salt comprise of 12 fixed-bodied spreading vehicles with a 6m<sup>3</sup> volume capacity. The vehicles are leased and they are stored at Rotherham's operational depot at Hellaby, Rotherham S66 8QL. There is also one multihog vehicle equipped with a vale unit salt spreader which is used to treat footways and pedestrian areas.

In response to the COVID19 pandemic, measures have been taken to protect and keep our winter fleet drivers as safe as possible. Risk assessments and method statements have been reviewed and updated accordingly and cleaning equipment has been provided in each vehicle. Drivers have also been dedicated to use the same vehicles whenever possible.

The Hirer is responsible during the contract period for:

- All external damage such as lights, windscreen, lenses, side guards, mudguards, scratches and creases and all additional accidental damage. This may be reported and left until the vehicle is off-hired if it does not pose a safety risk.
- Tyres – Punctures and damage other than that deemed to be fair wear and tear.

It is also the responsibility of The Hirer to maintain correct fluid levels and to replace oil, water, hydraulic oil, tyre pressures, electric fuses and bulbs.

## 11. Winter Vehicles Telematics

Each salting vehicle is equipped with satellite navigation, a vehicle tracking device and an Econ box for automated salting. All vehicle salting activities are tracked and recorded on the Exactrak website. This in-cab equipment improves efficiency within

salting operations, minimises salt usage and creates audit trails that can be used in future defence against third party claims.

Salting activities can be monitored by winter service staff by logging onto the Exactrak website using their own individual username and password.

## **12. Hire of Additional Plant**

If weather conditions dictate that additional or more appropriate plant is urgently required items may be hired from external suppliers.

## **13. Rock Salt**

### The Supply of Rock Salt to external Bodies and Departments

Salt may be supplied to the Fire and Rescue Service and Ambulance Service and to other departments of Rotherham Metropolitan Borough Council following the receipt of a purchase order which is approved by the Head of Highway Services. The provision of this salt is not guaranteed and is subject to there being enough to treat the road network as a priority. Any salt provided to external bodies or departments must be collected by them and also weighed out on the depot's axle weighbridge.

### Storage of Rock Salt

The salt dome at the operational depot at Hellaby contains the bulk of our salt and the maximum storage capacity here is 4,500 tonnes.

Rock salt stockpiled in open storage at Scotch Springs Depot near Maltby is stored at a maximum height not exceeding 2.5 metres. The maximum capacity is 2,000 tonnes and it is sheeted over with a durable protective weatherproof material.

### Measurement of Stock Levels

Arrangements must be made to ensure that stock levels are checked at least once per week and at a higher frequency during periods of high usage. Effective monitoring of salt use will be made through vehicle weighing.

The salt stock at Hellaby depot Salt stocks at prior to the start of the winter period will be a minimum of 4,000 tonnes. The stock level will be maintained at a minimum of 2,000 tonnes through the Council's supply contract with Compass Minerals, subject to a re-stock to 3,000 tonnes in mid December to provide a resilience level of 10 days heavy use prior to the holiday period when re-supply would be difficult.

### Footways and Shopping Area Salting

The Winter Co-ordinator will instruct an inspection by the Duty Supervisor if required to identify problem areas and carry out appropriate action including any necessary instruction to Community Safety and Street Scene.

## **14. Salt Bins**

### Streetpride Salt Bins

Salt bins are provided at sites which are known trouble spots not covered by salting routes or at very steep locations on the salting routes.

Salt bins are to remain out on site all year. Outside the winter season they are to be maintained full of salt and the lids fastened down with plastic ties. Just prior to the start of the winter season the bins will be inspected to ensure that they are sited correctly and are still full of salt and the plastic ties will be removed. Replenishment of salt bins will be arranged routinely following any prolonged period of adverse weather and in response to customer reports.

Sites subject to requests for salt bin provision are assessed against stated criteria in the Salt Bin Policy in Appendix C. There is no guarantee that a salt bin will be provided even if it meets the salt bin policy criteria. If it is deemed to be a more suitable solution, then residents may be offered the opportunity of becoming voluntary snow wardens

### Parish and Town Council Salt Bins

Parish and Town Councils may also provide, install and maintain their own salt bins subject to permission being granted by Highway Services and a formal agreement being signed between the Parish Council and Highway Services. Details of Parish and Town Council salt bin locations are listed in Appendix F.

## **15. Call-Out Arrangements**

Duty Supervisors are responsible for ensuring that operatives are aware of their standby period and for calling them out or informing them of proposed salting.

## **16. Standby Rotas**

The standby rotas cover an agreed standby period of twenty weeks. They commence at 17:30 on Monday and end at 08:00 the following Monday. Standby will be provided over two shifts throughout the week:

- Day and evening shift - covering the period from 17:30 to 00:30 Monday to Friday, and 07:30 to 19:30 Saturday and Sunday
- Night shift - covering the period from 00:30 to 08:00 Monday to Friday, and 19:30 to 07:30 Saturday and Sunday

## **17. Standby Payments**

Payments to all persons on the standby rotas are based on Band E.

## **18. UK Drivers Hours Rules**

In order to comply with the UK drivers hours rules, a two-shift standby system was introduced in 2010/ 2011 and this is still in operation. Four teams work this shift

system, each consisting of a Duty Supervisor, ten salting vehicle drivers and a loading shovel driver. Two teams operate the standby cover each week comprising:

- Day and evening shift - covering the period from 17:30 to 00:30 Monday to Friday, and 07:30 to 19:30 Saturday and Sunday
- Night shift - covering the period from 00:30 to 07:30 Monday to Friday, and 19:30 to 07:30 Saturday and Sunday

Throughout the season each team will undertake standby on a fortnightly basis with 5 weeks of each shift alternating between the two.

For the forthcoming season 4 hours duty time will be paid for a salting action. Therefore, in order to comply with the UK Drivers Rules:

- Where a precautionary salt is ordered for the evening shift then spreader drivers should finish daytime activity after 7 hours duty time.
- Similarly, if a single treatment of the network is undertaken after 00:30 then the drivers will be restricted to 7 hours duty time the following day.
- If two treatments are required after 00:30 then compensatory rest should be granted after 11 hours total duty time.

**During a significant snow event the Drivers Rules may be relaxed if the event is classed as an emergency.**

## 19. Health and Safety

Winter service operations are subject to the following method statements:

WS2	salting
WS3	washing down
WS4	salt loading – telehandler loading shovel
WS5	supervisor’s patrol
WS6	ploughs mount/ demount and ploughing
WS7	salt loading alternative machinery
WS8	hand salting footbridges
WS9	quad bike salt spraying
WS10	hand salting
WS22	Loading gritting vehicles with salt – Hellaby Depot
WS23	Salt delivery & forming a salt stack within the salt barn
MS HDS 04	Use of axle weighbridge – Supaweigh 4000

## 20. Partnership Working

### Farmers

Farmers who have signed an agreement with RMBC may be called upon to assist with plant and equipment hire during whiteout situations.

### Volunteer Snow Wardens

Volunteer snow wardens are selected prior to the start of the winter season to undertake snow clearing duties on footways within their own community. The areas to be targeted for snow clearance would be prioritised to areas that are frequented by vulnerable people such as access to community centres, schools, health centres, doctors surgeries and hospitals. Snow wardens receive their equipment and induction safety training by RMBC and they are required to sign a 'Fit to Participate' declaration.

### Parish and Town Councils

Parish and Town Councils are supplied with snow clearing equipment and rock salt by RMBC so that they can clear their own identified 'winter trouble spots'. These councils co-ordinate their own snow clearing operations whilst keeping Community Safety and Street Scene informed of their progress.

### Customers with Life Saving Hospital Appointments

For customers who require emergency hospital appointments i.e. dialysis, we do everything possible to clear the route to individual properties. If necessary, a 4x4 vehicle will be provided to transport the patient to access the open network wherever possible and wherever the resources are available.

## **21. Axle Weigher**

Effective monitoring of salt usage is via the SupaWeigh 4000 axle weigher. This is installed at the Hellaby depot. All salt entering and exiting the depot is weighed in accordance with the Method Statement in Appendix P and due regard is given to Health and Safety with the Risk Assessment in Appendix Q.

Weights can be monitored by winter service staff by logging onto the WeighWeb website using their own individual username and password.

Servicing, calibration and maintenance of the axle weigher is carried out by Avery Weigh-Tronix.

## **22. Multihog Vehicle**

RMBC has one Multihog multi-purpose utility vehicle which is used for highway maintenance, but it also has winter service attachments. It has a hydraulically operated salting unit and a heavy-duty lift, tilt and angle snow plough. This machine will primarily be used to treat heavily pedestrianised footways and routes to school in the south of the borough.

## **23. Duty Supervisor's Patrol**

A patrol route is available to assist Duty Supervisors with 'wet spot' sites around the borough that have been identified as being particularly susceptible to water run-off and

ice and frost formation. The patrol route is also used to allow Duty Supervisor's to make an informed decision when the weather forecast is 'marginal'.

#### **24. Precautionary Salting of Car Parks**

Members of the public must use the council owned car parks in accordance with the notices and regulations in force. Community Safety and Street Scene will take all reasonable measures to ensure that the car parks are safe to use. Rotherham Town Centre's Drummond Street car park will be the only town centre car park to be treated whenever precautionary salting of the highway is carried out. Restricted access to this car park during the day may influence exactly how and when it is treated. During periods of adverse weather conditions liaison with the Parking Services Manager will determine how to proceed with the clearance of snow and ice. The decisions made will be heavily dependant on the pressures being applied to current resources.

## **HIGHWAY SERVICES CONTACT NUMBERS**

## **CONTACT DETAILS OF SUPERVISORS AND CO-ORDINATORS**

## **MOTORWAY CONTRACTOR CONTACT DETAILS**

## **EMERGENCY SERVICES AND MEDIA CONTACT DETAILS**

## TRANSPORT COMPANIES CONTACT DETAILS

## NEIGHBOURING LOCAL AUTHORITIES CONTACT DETAILS

## **RECIPROCAL ARRANGEMENTS WITH NEIGHBOURING LOCAL AUTHORITIES**

During snow conditions, these reciprocal routes are to be ploughed when the precautionary routes are ploughed.

### **1. Agreement with Derbyshire County Council**

#### **Roads within Derbyshire to be treated by Rotherham MBC**

- (i) C11 Harthill Lane, Barlborough - from the Rotherham/ Derbyshire boundary to A618 Rotherham Road, Barlborough.
- (ii) C225 Woodall Road, Killamarsh – from the Rotherham/ Derbyshire boundary to A618 Mansfield Road, Killamarsh.

### **2. Agreement with Barnsley Metropolitan Borough Council**

#### **Roads within Rotherham to be treated by Barnsley MBC**

- (i) B6273 Pontefract Road, Brampton Bierlow - from the Rotherham/ Barnsley boundary to CU02 Barnsley Road, Brampton Bierlow.
- (ii) B6097 Smithy Bridge Lane, Brampton Bierlow – from the Rotherham/ Barnsley boundary to Smithy Bridge Lane roundabout, Brampton Bierlow.

#### **Roads within Barnsley to be treated by Rotherham MBC**

- (i) CU02 Wath Road, Brampton Bierlow - from the Rotherham/ Barnsley boundary to Wath Road roundabout, Brampton Bierlow.
- (ii) Wath Road roundabout, Brampton Bierlow – all the way round.
- (iii) B6089 Brampton Road, Brampton Bierlow - from the Rotherham/ Barnsley boundary to the Brampton Road/ Wath Road roundabout, Brampton Bierlow.
- (iv) C596 Dearne Road, Bolton upon Dearne - from the Rotherham/ Barnsley boundary to C596 Wath Road, Bolton upon Dearne.
- (v) A6023 Manvers Way - from the Rotherham/ Barnsley boundary to Broomhill roundabout, Broomhill.

### **3. Agreement with Doncaster Metropolitan Borough Council**

#### **Roads within Rotherham to be treated by Doncaster MBC**

- (i) A6023 Wath Road, Wath upon Dearne - from the Manvers Way/ Wath Road roundabout to the Rotherham/ Doncaster boundary.
- (ii) A631 Tickhill Road – from Limekiln Lane to the Rotherham/ Doncaster Boundary.
- (iii) C133 Denaby Lane, Hooton Roberts – from B6090 Kilnhurst Road to the Rotherham/ Doncaster Boundary.

#### **Roads within Doncaster to be treated by Rotherham MBC**

- (i) A6022 Swinton Road, Swinton - from the Rotherham/ Doncaster boundary to Wath Road roundabout, Mexborough.
- (ii) B6098 Bolton Road - from the railway bridge on Bolton Road to C72 Sticking Lane roundabout, Bolton upon Dearne.
- (iii) B6376 Braithwell Road and Maltby Lane, Maltby – from the Rotherham/ Doncaster boundary to B6427 Holywell Lane, Braithwell.

- (iv) B6427 Holywell Lane and Fish Pond Lane, Braithwell – from B6376 Maltby Lane to the Rotherham/ Doncaster boundary.
- (v) C278 Limekiln Lane - from A631 Tickhill Road to C325 Stainton Lane, Stainton.
- (vi) C325 Stainton Lane - from the Rotherham/ Doncaster boundary to C278 Limekiln Lane, Stainton.

#### **4. Agreement with Sheffield City Council**

##### **Roads within Rotherham MBC to be treated by Sheffield CC**

- (i) A630 Sheffield Parkway eastbound – from the Rotherham/ Sheffield boundary to Parkway M1 roundabout.
- (ii) A630 Sheffield Parkway westbound – from Parkway M1 roundabout to Rotherham/ Sheffield boundary.
- (iii) B6200 Retford Road eastbound, Woodhouse Mill – from the Rotherham/ Sheffield boundary to Fence roundabout, Fence.
- (iv) B6200 Retford Road westbound, Woodhouse Mill – from Fence roundabout, Fence to the Rotherham/ Sheffield boundary.

##### **Roads within Sheffield to be treated by Rotherham MBC**

- (i) B6066 Highfield Lane, Orgreave – from the Rotherham/ Sheffield boundary to Orgreave Lane (unclassified), Orgreave.
- (ii) A6178 Sheffield Road, Templeborough – from the Rotherham/ Sheffield boundary to Tinsley Roundabout.
- (iii) A631 Bawtry Road, Brinsworth – from the Rotherham/ Sheffield boundary to Tinsley Roundabout.
- (iv) A630 Parkway – the exit and entry sliproads A57 and A630, Handsworth.
- (v) B6086 Grange Lane, Blackburn – from the Rotherham/ Sheffield boundary to Ecclesfield Road, Sheffield.
- (vi) Jumble Lane, Butterthwaite – from the Rotherham/ Sheffield boundary to Butterthwaite Lane, Butterthwaite.

#### **5. Agreement with Nottingham County Council**

##### **Roads within Nottingham to be treated by Rotherham MBC**

- (i) A634 Blyth Road, Oldcotes – from the Rotherham/ Nottingham boundary to the roundabout at the A60 Doncaster Road.
- (ii) B6463 Lamb Lane, Oldcotes - from the Rotherham/ Nottingham boundary to the A60 Doncaster Road.
- (iii) C70 Woodsetts Lane, Gateford Common - from the Rotherham/ Nottingham boundary to Gateford Common roundabout.
- (iv) A57 Gateford Road (eastbound only), Gateford Common - from Gateford Common roundabout to the Rotherham/ Nottingham boundary.
- (v) C100 Rotherham Baulk, Costhorpe – from the Rotherham/ Nottingham boundary to A60 Doncaster Road.

## FORECAST PREDICTING FREEZING TEMPERATURES

### NOTES TO ACTION TABLE

1. Particular attention should be given to the possibility of water running across carriageways and other running surfaces, e.g. off adjacent fields after heavy rains, washing off salt previously deposited. Such locations should be kept under scrutiny and may require treating in the evening and morning, and possibly on other occasions.
2. When a Forecast contains reference to expected hoar frost considerable deposits will usually occur. Hoar frost usually occurs in the early morning and is difficult to cater for because of the probability that any salt deposited on a dry road too soon before its onset may be dispersed before it can become effective. Particular vigilance is required under this forecasted condition which is ideally treated just as the hoar frost is forming. Such action is usually not practicable and salt may have to be deposited on a dry road prior to and as close as possible to the expected time of the condition. Hoar frost may be forecast to occur at other times in which case the timing of salting operations should be adjusted accordingly.
3. If, under those conditions, rain has not ceased by early morning, crews must be called out and action should be initiated as rain ceases.
4. Under these circumstances, rain will freeze on contact with running surfaces and full pre-salting must take place even on dry roads. This is a most serious condition and constant vigilance must be maintained throughout the danger period.
5. Forecasts are often qualified by altitudes in which case differing action may be required from the depot.
6. If a marginal forecast is received and/or the forecast indicates that the condition could be significantly different across Rotherham, then supervisors' patrols are recommended.
7. A decision on whether or not to treat Rotherham Town Centre footways will be made based on the forecast sites and evidential data demonstrating the degree of temperature difference between forecast sites and town centre surface temperatures.
8. See TABLE 1 for actions

**TABLE 1 - FORECAST PREDICTING FREEZING TEMPERATURES**

	Road surface Temperature	May fall below freezing	Expected to fall below freezing – See Note (5)			
Road Conditions	Precipitation etc.	No rain No hoar frost No fog	Expected hoar frost Expected fog	Expected rain before freezing	Expected rain during freezing	Possible rain Possible hoar frost Possible fog
Wet		1	1	3 See note (3)	1 & 4 See note (4)	4
Wet patches		2 See note (1)	2 & 4 See note (2)	3 See note (3)	1 & 4 See note (4)	5
Dry		6 See note (1)	4 See note (2)	3 See note (3)	1 & 4 See note (4)	5
Pre-salted within last 24 hours with no rain since		6 See note (1)	6 See note (1)	3 See note (3)	4 See note (4)	5

**Action**

- |                                  |   |
|----------------------------------|---|
| 1 Salt early morning             | 4 Salt early morning                                      |
| 2 Salt wet patches early evening | 5 Supervisor inspect early morning with crews standing by |
| 3 Salt after rain stops          | 6 No action   |

**Notes to Action Table**

- Particular attention should be given to the possibility of water running across carriageways eg. off adjacent fields after heavy rain, washing off salt previously.
- When a forecast contains reference to expected hoar frost, considerable deposits will usually occur. Hoar frost usually occurs in the early morning and is difficult to cater for because of the probability that any salt deposited on a dry road too soon before its onset may be dispersed before it can become effective. Particular vigilance is required under this forecast condition which is ideally treated just as the hoar frost is forming. Such action is not usually practicable and salt may have to be deposited on a dry road before the condition forms. Hoar frost may be forecast to occur at other times in which case the timing of salting operations should be adjusted accordingly.
- If, under those conditions, rain has not ceased by early morning, crews must be called out and action should be initiated as rain ceases (action 5).
- Under these circumstances, rain will freeze on contact with the road surface and full pre-salting must take place even on dry roads. Constant vigilance must be maintained throughout the danger period.
- Forecasts are often qualified by altitudes in which case differing action may be required of each depot.

**APPENDIX B – BREAKDOWN CONTACT DETAILS**

**RMBC Hellaby Depot - Workshop Contact Details**

## **APPENDIX C – SALT BIN POLICY**

### **Salt Bin Policy**

Salt bins are provided and filled before the start of the winter season and they are to remain on site throughout the year. They are provided and maintained for "self-help" so that highway users can treat adopted roads and footways themselves. The siting of a salt bin is dependent upon there being a suitable location available which does not obstruct pedestrians. There can only be a 'finite' number of salt bins provided which will then enable them all to be replenished within a reasonable time. Therefore not all sites that satisfy the policy criteria will necessarily be allocated a salt bin. Where this is the case the use of volunteer snow wardens will be promoted.

#### **Sites for salt bin provision will generally meet several of the following criteria:**

- Gradients steeper than 1 in 10
- Approaches to junctions that are on an incline
- Sharp bends
- Heavily pedestrianised areas and footways such as town centres and busy shopping areas
- Locations that are commonly used by vulnerable users

#### **Where salt bins are not provided**

Salt bins are not provided for use on unadopted highways, private properties and any residential parking areas or garage sites.

#### **Removal of salt bins**

Should a site prove problematic because of regular misuse of the salt for private driveways etc or the salt bin becomes vandalised then RMBC reserve the right to remove the salt bin. All reports of vandalism and theft will be reported to the police.

#### **Parish Council Salt Bins**

Parish Councils that have been granted permission by RMBC may provide and maintain salt bins at locations in accordance with the terms and conditions of the agreement. These salt bins are of a colour that distinguishes them from RMBC's salt bins and they display a telephone number for contacting the Parish Council.

## **APPENDIX D - PUBLIC CAR PARKS**

### **Safe Use of Council Owned Car parks**

All vehicles using council owned car parks must be driven and parked with care and extra consideration should be taken during severe and adverse weather conditions. Greater care must be taken during severe weather conditions to ensure the safety of pedestrians. On sloping sites, vehicle drivers are advised to check that their vehicle is not likely to slide due to black ice on the road surface. Drivers are also advised to return to their vehicles at regular intervals to ensure that their vehicles remain safe.

### **Salt Bins in Car Parks**

Salt bins are provided to help customers of the following Rotherham town centre car parks:

- Clifton Hall car park
- Cottenham Road car park
- Douglas Street car park
- Drummond Street car park
- Rawson Road car park
- SCALA car park
- Wellgate North car park
- York Road car park

In the event of severe weather conditions these salt bins will be refilled as resources permit. Members of the public may report empty or damaged salt bins on 01709 336003.

- 3.10 Assessment & Design Team Action Plan.

**4.0 RESPONSIBILITIES**

- 4.1 The Head of Service is responsible for approving this work instruction, and for any changes in policy and/or practices in relation to this work instruction.
- 4.2 The Senior Engineer, Assessment & Design Team is responsible for implementing, controlling and monitoring the adherence to this work instruction.
- 4.3 All staff are responsible for complying with this work instruction.

**5.0 DEFINITIONS**

- 5.1 Icelert System – Weather monitoring stations placed throughout Rotherham.
- 5.2 RBT – Rotherahm M B C and BT partnership.
- 5.3 DfT – Department of Transport.
- 5.4 “White Out” – Where there is continuous snowfall or lying snow, and/or when there are continuous freezing conditions.
- 5.5 “Non White Out” – When snow and/or freezing conditions are only of short duration, less than half a day.

**6.0 PROCEDURE**

- 6.1 Salt Bins
  - 6.1.1 Salt bins are managed in line with the Winter Services – Salt Bin – Flow Chart, [SP/021/F70](#).
- 6.2 Precautionary Salting/Snow Clearing
  - 6.2.1 Precautionary salting/snow clearing is managed in line with the Winter Services – Precautionary Salting/Snow Clearing – Flow Chart, [SP/021/F71](#).

### 6.3 Reports

6.3.1 Reports for winter services not covered by salt bins or precautionary salting/snow clearing are managed in line with the Winter Services – Reports – Flow Chart, [SP/021/F72](#).

## 7.0 RELATED FORMS AND SCHEDULES

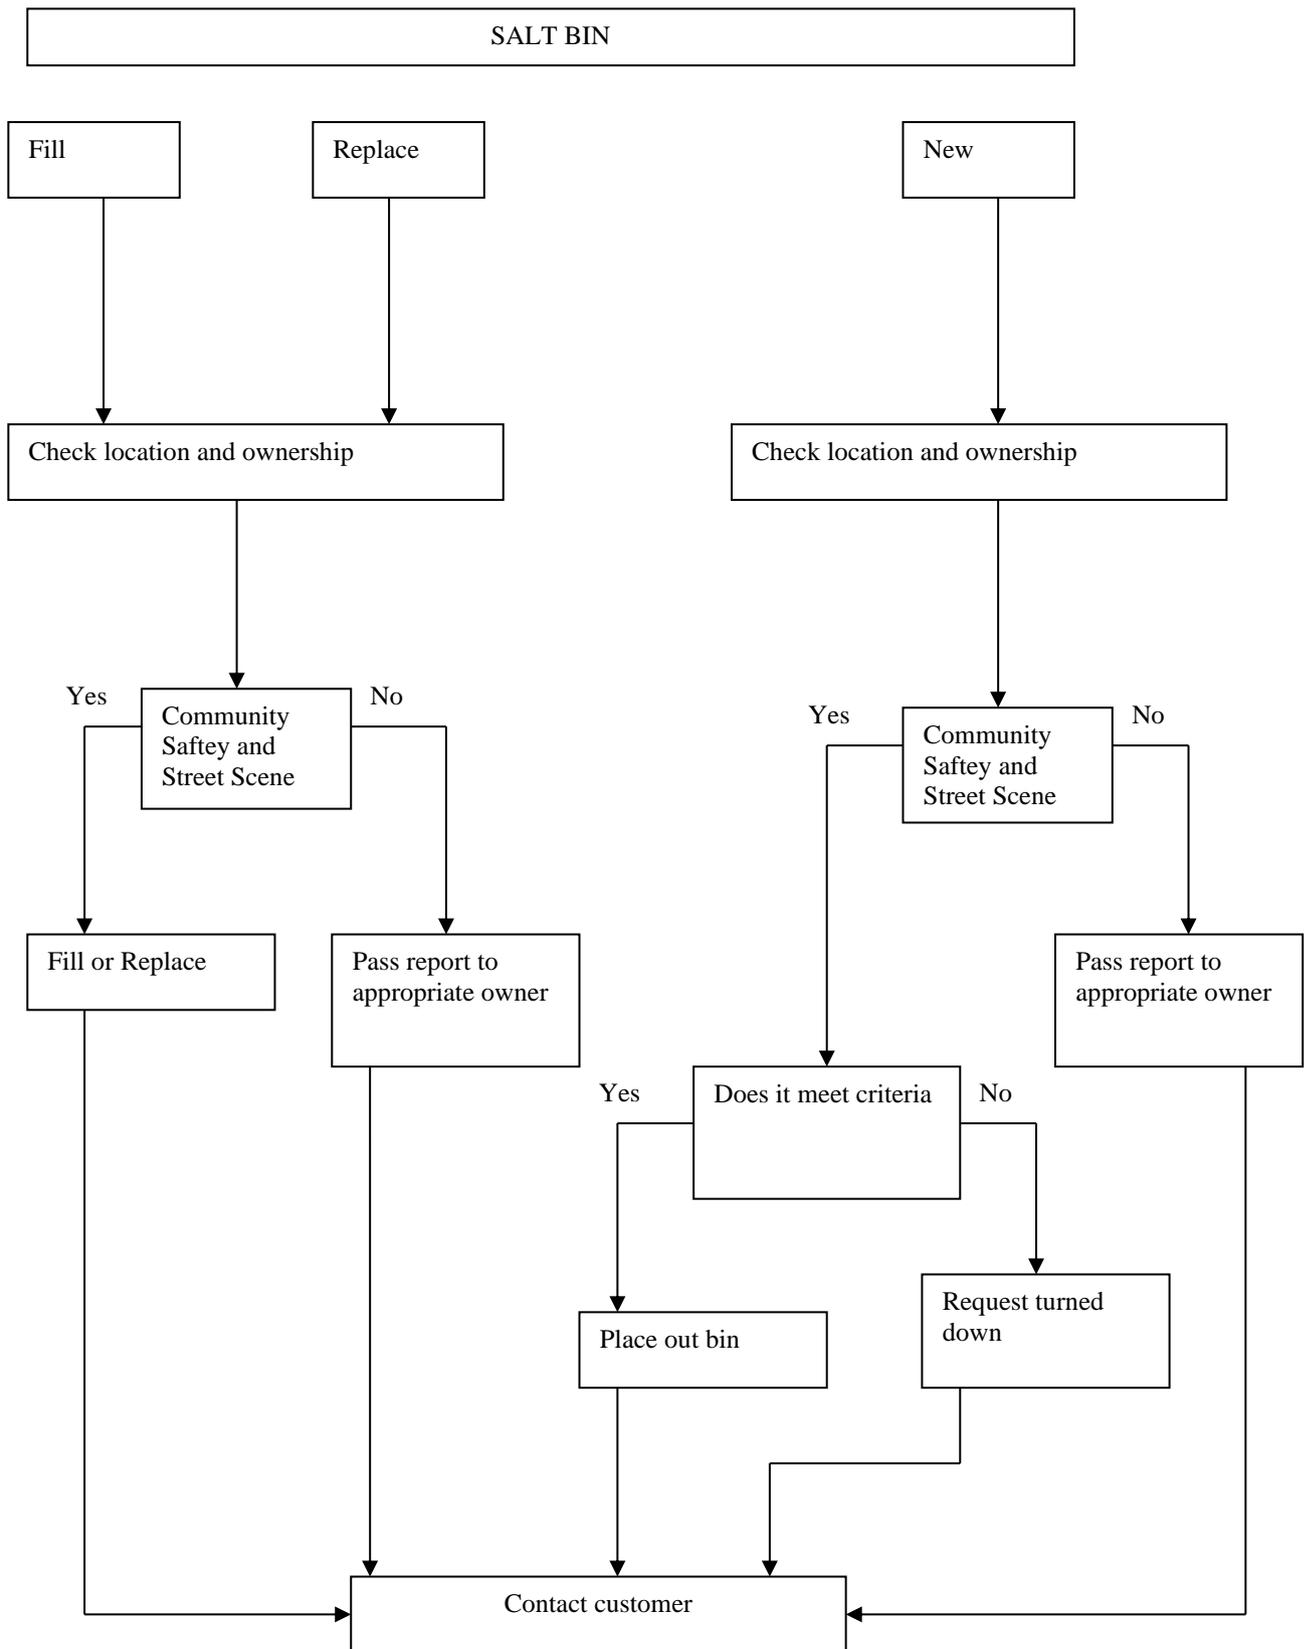

7.1 Forms that relate to this work instruction are:

Form [SP-021-F67-PreSaltRecord](#).

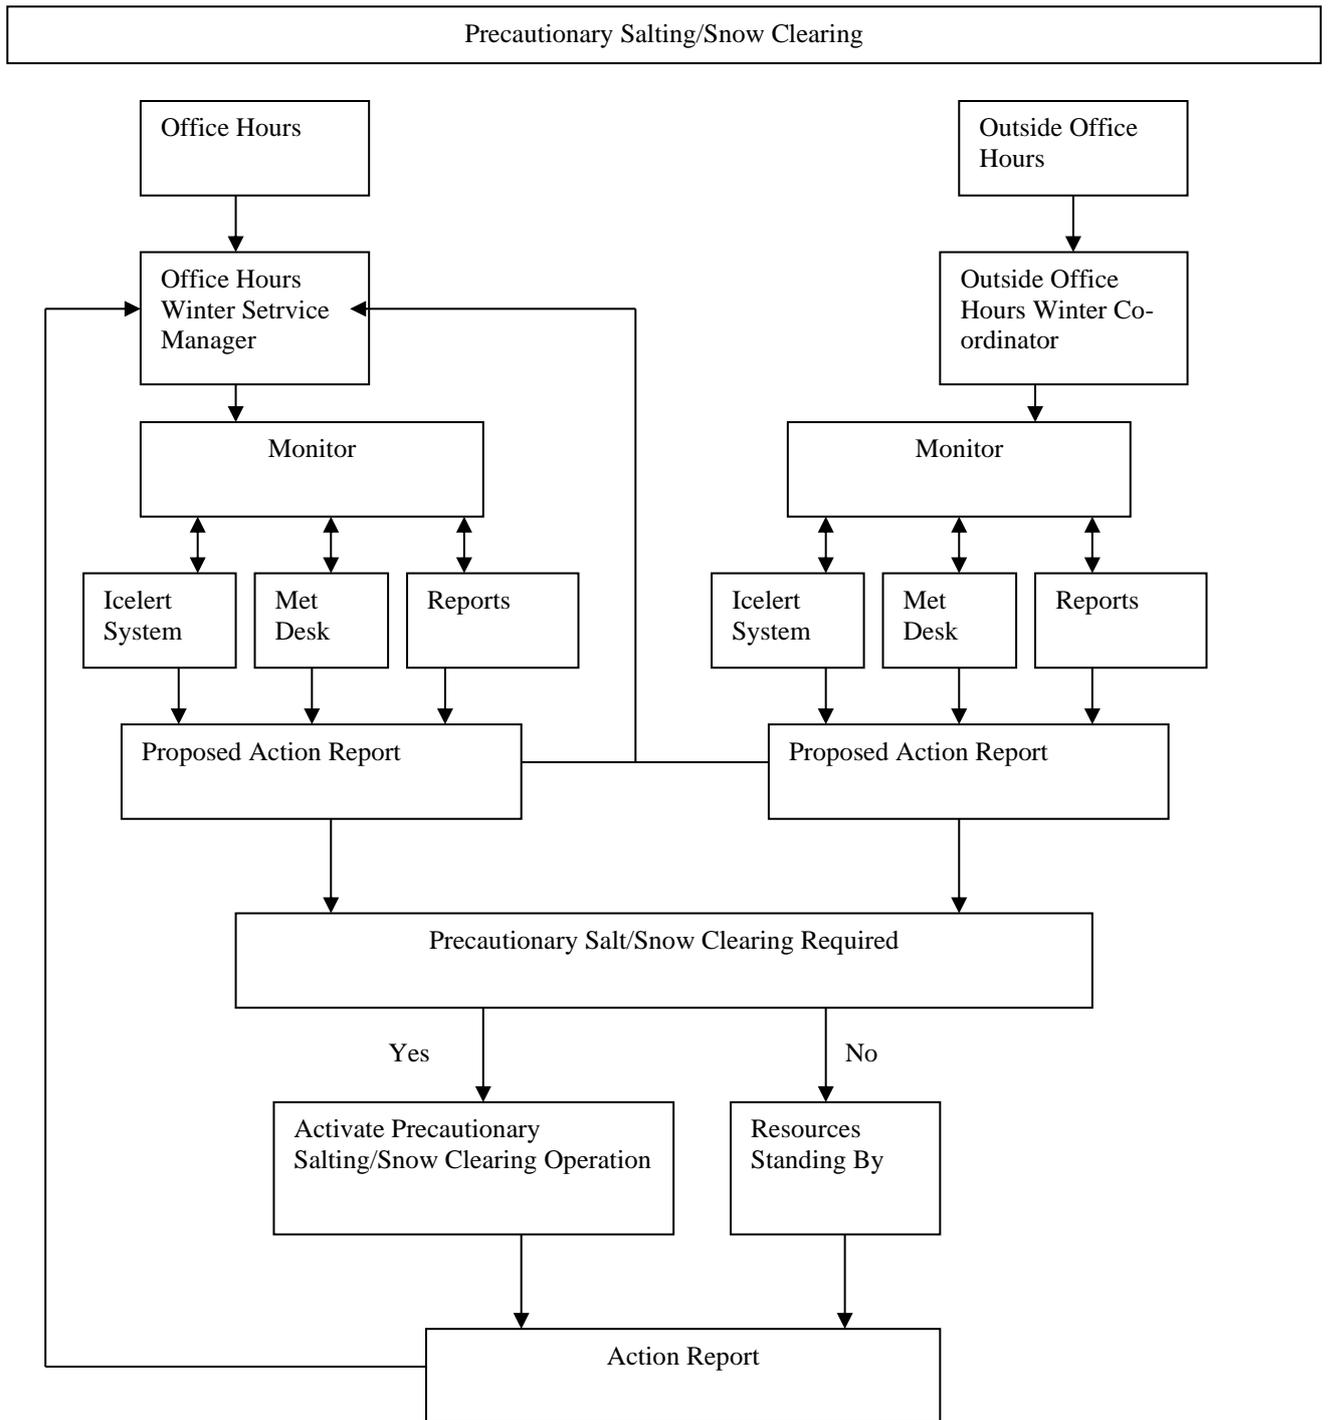

Form [SP-021-F68-SaltBinLabel](#).

Form [SP-021-F69-WMDAS](#).

## **APPENDIX P – WEIGHBRIDGE METHOD STATEMENT**

**Method Statement: MS HDS 04**

**Description of work: Use of the Axle Weighbridge – Supaweigh 4000**

**Location: Hellaby Depot**

**Sequence of Operations:**

**Option for vehicles that are fitted with a transponder:**

1. The operative must wear the correct PPE for the depot
2. Ensure the Supaweigh is displaying '0 0 0 0 0'
3. Stop the vehicle at least 4 metres from the axle weigher
4. Engage crawler gear, if available, and proceed in a controlled manner at a steady speed not exceeding 5 km/h. Do not apply the brake at any stage of the weighing and do not accelerate
5. Each axle weight will be displayed as it passes over the axle weigher
6. Continue to drive until the last axle has cleared the axle weigher
7. If the vehicle has travelled too fast then the word 'FAST' will be displayed on the Supaweigh and the driver will have to return to the start and re-weigh
8. Drive the vehicle to the area to be loaded with the required material i.e. rock salt.
9. Repeat steps 1 to 7 to obtain a fully laden weight
10. Drive the vehicle away from the weighbridge area and exit the depot
11. When the vehicle re-enters the depot repeat steps 1 to 7 to obtain the weight of material used

**Option for vehicles that are not fitted with a transponder:**

1. The operative must wear the correct PPE for the depot
2. The operative will go to the stores and present their requisition to collect material (which has been authorised and signed by the appropriate manager) to the stores personnel
3. The stores personnel will accompany the operative to the weighbridge
4. Ensure the Supaweigh is displaying '0 0 0 0 0'
5. Stop the vehicle at least 4 metres from the axle weigher
6. Engage crawler gear, if available, and proceed in a controlled manner at a steady speed not exceeding 5 km/h. Do not apply the brake at any stage of the weighing and do not accelerate
7. Each axle weight will be displayed as it passes over the axle weigher
8. Continue to drive until the last axle has cleared the axle weigher
9. If the vehicle has travelled too fast then the word 'FAST' will be displayed on the Supaweigh and the driver will have to return to the start and re-weigh
10. Stop the vehicle
11. The stores personnel will enter the vehicle registration and press 'Enter' twice on the weighbridge instrument panel
12. The stores personnel will enter the 'service area' on the keypad when 'Customer?' is displayed and press enter
13. When requested to do so by the stores personnel, drive the vehicle to the area to be loaded with the required material i.e. rock salt.
14. Repeat steps 1 to 10 to obtain a fully laden weight
15. Drive the vehicle away from the weighbridge area

**Never:**

Operate the equipment until you have been trained and are familiar with the controls  
Smoke or consume food /drink whilst operating the machinery  
Leave keys in an unattended vehicle  
Overload the vehicle

**Hazards:**

Slip, trip and fall

**Supervision:**

The supervisor will ensure that the safe means of working is complied with, and will directly control all work. The supervisor will liaise with the line manager concerning any issues out of his control

**Training:**

All operatives will be suitably and sufficiently trained to carry out all the activities safely

The supervisor will ensure that all operatives are complying with the above

**Precautions and Equipment required before work commences, the line manager shall:**

Ensure that all persons are trained to carry out the task.

Ensure that all persons have seen and understood the risk assessment / method of work

Provide suitable and sufficient PPE

**Environmental Controls:**

Every effort is to be made to keep noise, dust and waste levels to a minimum, and to ensure that they do not cause a hazard or become a nuisance to others.

Working areas will be tidied regularly and waste removed to Approved Waste Disposal sites or recycling area.

**Personal Protective Equipment, First aid and emergency procedures:**

All employees and sub-contractors will wear protective footwear, high visibility clothing at all times whilst on site. Other PPE such as gloves, safety helmet, eye protection, hearing protection, respiratory protection, and other protective clothing will be issued and worn as required.

All employees will be made aware of the first aid/ emergency procedures.

## APPENDIX Q - WEIGHBRIDGE RISK ASSESSMENT

COMMUNITY SAFETY & STREET SCENE

Page 1 of 3

### RISK ASSESSMENT RECORD - MANAGEMENT OF H & S AT WORK REGS

PREMISES/SITE LOCATION: Hellaby Depot

WORK ACTIVITY: Use of Supaweigh 4000 weighbridge

ASSESSOR: Unknown

REVIEWED/REVISED BY: N. Ayrton DATE REVIEWED/REVISED: September 2019

NEXT REVIEW DATE:

1. HAZARDS IDENTIFIED	2. RISK RATING	3. PEOPLE AT RISK	4. CONTROLS	5. COMMENTS/ACTION/RECOMMENDATIONS
Vehicle Roadworthiness/ Drivers responsibilities	High	Employees	A pre-start check is to be carried out on every vehicle before use (including plant) this is then to be recorded daily onto a daily check sheet. Any defects are to be reported immediately to the transport coordinator. All drivers are responsible for the security of their vehicle and all drivers are to wear seat belts fitted. All drivers are to produce a current driving license for checking every 6 months as in line with council policy/procedure. No keys are to be left in unattended vehicles	Daily check sheet training can be obtained from the CTU  All drivers are informed about vehicle security i.e. "toolbox talk"  Driving license are to be checked by the CTU (every 6 months)
Unauthorized drivers	High	Employees	All drivers of fleet and hired vehicles are to be "passed out" by the CTU. All vehicles are to be locked when exited by the driver (except where an operative is left in the vehicle)	
Reversing vehicle	Medium	Employees	Wear high viz clothing and other PPE. There is a one way system for entry and exit. All operatives are to be informed of "a guide to safe reversing" document. Banksman training to be conducted by the CTU	All vehicles up to 3.5t to be fitted with reversing bleeper's .All vehicles above 7.5t to be fitted with revering bleeper's plus reversing cameras (wherever practicable)
Unloading/Loading materials	Medium	Employees	Ensure that all unauthorized persons are kept clear of the working area. Signalers/slingers to wear high viz clothing and be adequately trained. Ensure that the right capacity machine is used for the task. All drivers to be trained to CTA standard or equivalent all drivers are to follow the safe method of work. All lifting equipment is to comply with LOLER/PUWER regulations	
Poor Maintenance	High	Employees	Ensure that manufacturers schedules are complied with & driver defect inspections are carried out as per the PUWER regulations	Driver defect training can be obtained from the CTU
Access and Egress of vehicle	Medium	Employees	Keep steps etc clean ensure good footwear is worn .Wherever possible. Do not egress vehicle into live traffic routes.

ASSESSOR: Unknown

REVIEWED/REVISED BY: N. Ayrton    DATE REVIEWED/REVISED: September 2019  
 NEXT REVIEW DATE:

1. HAZARDS IDENTIFIED	2. RISK RATING	3. PEOPLE AT RISK	4. CONTROLS	5. COMMENTS/ACTION/RECOMMENDATIONS
Falling Materials	Medium	Employees	All loads are to be secured by the correct means i.e. ratchet straps, nets etc vehicles are not to be overloaded (on plant do not overload buckets, skips etc) All salt is to be raked through gritter (not left loose on the top) using the scaffolding provided. Persons to be kept out of the loading area .Stacking areas should be clearly marked and on level ground with good clearance for lifting. Fit ROP cage to vehicle as per the PUWER regulations	
Physical injury due to contact with items etc	Medium	Employees	Ensure that operatives wear the correct PPE and instruction given on its use. I.e. Gloves boots, safety glasses ear defenders, overalls etc. A first aid box to be present on site at all times. Operatives to be trained in basic first aid	
Slips, Trips and Falls	Medium	Employees	Keep site clean and tidy at all times.	
Manual Handling	Low	Employees	Ensure that an assessment is carried out before work commences. Reduce the need to handle materials & provide lifting aids where possible. Ensure that operatives are trained on manual handling	Ensure that operatives attend a training course and refresh every 5 years
Exposed to extreme weather conditions etc	Low	Employees	Ensure that adequate PPE is provided	
Working Alone	Low	Employees	Ensure that the supervisor is aware of where you are working and have constant communication with them i.e. mobile phone

WORK ACTIVITY: Use of Supaweigh 4000 weighbridge

ASSESSOR: Unknown

REVIEWED/REVISED BY: N. Ayrton    DATE REVIEWED/REVISED: September 2019  
 NEXT REVIEW DATE:

1. HAZARDS IDENTIFIED	2. RISK RATING	3. PEOPLE AT RISK	4. CONTROLS	5. COMMENTS/ACTION/RECOMMENDATIONS
Violence at work	Low	Employees	Confrontation is to be avoided at all times even if it means walking away and leaving your tools etc. When walking away try to get to your vehicle, if this is not an option try to get where people are present, i.e. shops etc .Any confrontation should be reported to your line manager immediately. All operatives to be instructed on the above	All operatives to attend appropriate training courses
Working on the Public Highway and Contact with vehicles	Low	Employees	Traffic management to chapter 8.Wear high viz clothing and other appropriate PPE. All supervisors and operatives to be adequately trained NRSWA to be followed. . "Safety at street works and road works a code of practice" booklet is to be followed	Only class 3 high viz vests to be worn
Contact with Hazardous substances	Low	Employees	Ensure that a COSHH assessment is carried out and provided before use. Provide appropriate PPE and instruct operatives on its use. Wash Hands before eating etc. Provide water proof gloves, boots etc use water proof plasters on cuts etc	
Exposure to Noise/Dust/Vibration	Low	Employees	Ensure that operatives wear the appropriate PPE, i.e. eye protection/ ear protection/ gloves/ dust mask/boots/overalls/high viz clothing. All operatives are to be fully trained on equipment. All operatives are to fill in the daily vibration "Time on tools" sheet. All operatives are health screened for noise/vibration and controls put into place for operatives most at risk.	Always try to obtain the lowest vibratory equipment that's practicable Health and Safety section to check vibration levels at agreed intervals
